The key areas we are focusing on include eight critical competencies: Communication, Leadership (trust, direction, motivation), Adaptability, Relationships, Task Management, Production, Development of Others, and Personal Development. Sevilla Rhoads

Hall, Render, Killian, Heath & Lyman, LLC

What's Changing in the Law... and What you can do about it!

Highlights of new developments in employment and labor law which impact healthcare organizations and providers PLUS practical tips regarding what human resources may want to do (or not do) in response to the constantly changing legal landscape they face. This presentation covers the significant recent developments relevant to Washington healthcare employers and uses several of those updates to engage in a practical discussion about how HR can integrate changes in the law into their overall approach including their organization's leadership and engagement missions.

Sevilla has practiced labor and employment law for approximately 20 years. A former health care provider and health care business owner herself, Sevilla has a genuine appreciation for how a lawyer should support clients' patient care priorities and business realities. Her behavioral health training and significant workplace conflict resolution experience helps clients positively navigate disputes with the least disruption to patient care. She is also experienced in finding practical compliance solutions tailored to her clients' specific work environments. Compliance and prevention services offered by Sevilla include workplace investigations, training, contract and policy drafting. When faced with litigation, clients benefit from Sevilla's extensive trial and arbitration background. Understanding the importance of their relationships with other providers, patients and the community, she obtains dismissals and verdicts in her clients' favor without compromising the clients' organizational values around respect and collaboration. In addition to her focus on health care, Sevilla has had the distinct honor of many years advising and representing Indian Tribes, including defending sovereignty rights and strategies for increased self-governance. She is a frequent presenter on the unique issues arising in human resources for Tribes.
