In 2012 our theme for National Health Center Week is 'Celebrating America's Health Centers: Powering Healthier Communities'. The theme this year is meant to showcase the multitude of ways in which America's Health Centers are "powering" and "empowering" healthier communities. As health care providers Health Centers deliver high quality, cost effective, accessible care, keeping communities healthy and productive. As local community owned and operated businesses, Health Centers employ hundreds of thousands of individuals at more than 8,100 delivery sites across the nation and serve as critical economic engines helping to power local economies.

In addition to their long history as health care homes to millions, Health Centers are also proud to maintain a more than 45 year record being ranked among the highest quality and cost effective care providers in the nation. Health Centers provide their services to all people, regardless of their ability to pay or insurance status. Today, America's Health Centers serve over 20 million people (including 862,776 Farmworkers and more than 1 million people who are Homeless) at more than 8,100 delivery sites in all 50 states, the District of Columbia, Puerto Rico and U.S. territories.

This year, as every year, we invite you to join us in celebrating National Health Center Week 2012, August 5th-11th to recognize the work America's Health Centers do each day to work toward the goal of ensuring everyone has access to a health care home.
